Fold the Tech410 braided cord into 2 equal lengths and insert looped end through the rear hole

Letter Opener Tech410 Handle Wrap by SnakeDr

Insert the looped end into the front hole

Turn over the Letter Opener and feed the loose ends of the Tech410 through the loop

Letter Opener Tech410 Handle Wrap by SnakeDr

Pull tight

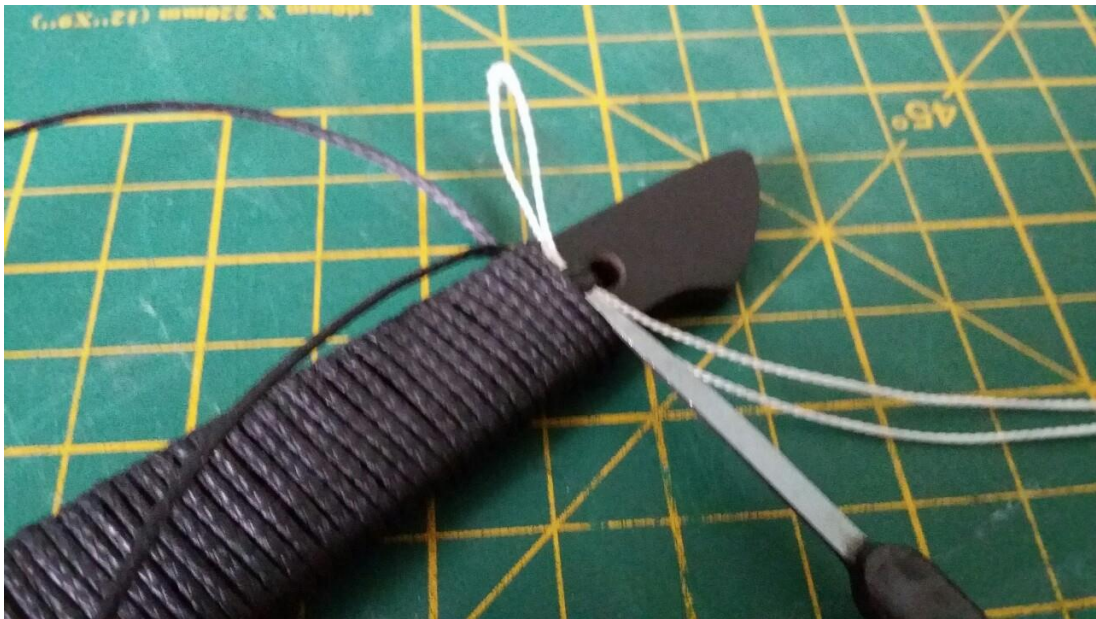

Now start wrapping the cord around the handle

## Letter Opener Tech410 Handle Wrap by SnakeDr

When you get to the end use a tool to create a small gap in the cord near the rear hole

Tip: as an alternative you can place a match under the cord to maintain the gap

Using the inner cord from 550 Paracord create a loop to pull the Tech410 through

Letter Opener Tech410 Handle Wrap by SnakeDr

It should look like this – pull it as tight as possible to lock the cord

Now feed the cord through the back hole and add a knot to stop it coming back through

Letter Opener Tech410 Handle Wrap by SnakeDr

Tie off the loose cord as shown or trim off
